

Ultrasonic Cutter

UC-50

Non-fray Cutting

*This is an optional equipment for
Vega2000W and Vega3000.*

The ultrasonic vibration induces a molecular fever in the fabric and melts it down. This mechanism makes non-fray at a cutting plane possible. It realizes double sided printing on satin tapes.

TECHNICAL SPECIFICATIONS

Model	UC-50
Cut Speed	70 to 120 mm/second
Cuttable Label Width	Maximum 42mm
Stacker Mechanism	Auto-descending Type (Maximum Height: 150mm)
Power Consumption	AC100V 50/60Hz (It needs a power transformer to convert voltage overseas.)
